

Oral care online education

IN April 2016 GSK, the manufacturer of Corsodyl, Poligrip, Sensodyne and Pronamel, launched four free certified CPD modules.

Each provides 1.5 hours of verifiable CPD and so far over 2000 modules have been completed, meaning GSK has provided over 3000 hours of free, verifiable CPD to DHCPs across the country.

The modules focus on a range of topics including gum disease and the Basic Periodontal Examination (BPE), the effects of tooth loss and dentures for patients, the mode of action of NovaMin in Sensodyne Repair & Protect and the Basic Erosive Wear Examination.

They can be completed remotely at a pace that suits the user. Access to all modules, as well information on GSK products, is available at www.gsk-dentalprofessionals.co.uk/ ■

Reaching optimum oral hygiene levels

"AFTER using the Waterpik Water Flosser I have to say I'm surprised by how much I liked it."

Katie Shephard, dental hygienist and therapist met with the Waterpik International, Inc. team at Europerio8. She continues: "I certainly believe it has a place when used alongside the mechanical removal of soft deposit."

"I would definitely recommend this product to any patients that find reaching an effective oral-hygiene level difficult such as those with disabilities, elderly patients with reduced dexterity or patients undergoing specialist treatments such as implants, orthodontics or periodontics."

As Katie says, they are ideal for patients with orthodontic appliances, implants, crowns, bridges or periodontal pockets, as well as those with limited dexterity.

To find out more about the range of Water Flossers, available from Waterpik International, Inc., call the team today. For more information on Waterpik International, Inc. please visit www.waterpik.co.uk. Waterpik products are available at Amazon, in Boots and at Superdrug stores across the UK and Ireland. ■

"passionate about Curaprox products"

"WHEN you provide high-quality products, you get good results," says Anna Middleton, a self-employed Dental Hygienist who goes by the name of @londonhygienist on Instagram. "That is why I offer Curaprox's safe, gentle and effective solutions to my patients."

"One of my favourite Curaprox products is the CS 5460 ultra soft toothbrush. Colourful, attractive and easy to use, it is an ideal solution for any patient – it even comes with a protective casing to ensure that the head is safeguarded against environmental contamination."

"Plus, Curaprox's manual toothbrushes are extremely long lasting thanks to their specially designed CUREN filaments, not to mention that they are ultra-gentle and kind to patients' gums."

"The CS single brushes are fantastic too, especially for patients looking to go the extra mile with their oral hygiene."

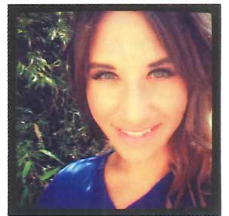

"As for the Black Is White whitening toothpaste, it's great to know that there is an effective product out there that patients can use without causing abrasion to their teeth."

"For all of those reasons, Curaprox for me stands head and shoulders above the rest."

For a full list of products and to discover how Curaprox could benefit your patients, contact the team today.

For more information please call 01480 862084, email info@curaprox.co.uk or visit www.curaprox.co.uk ■
